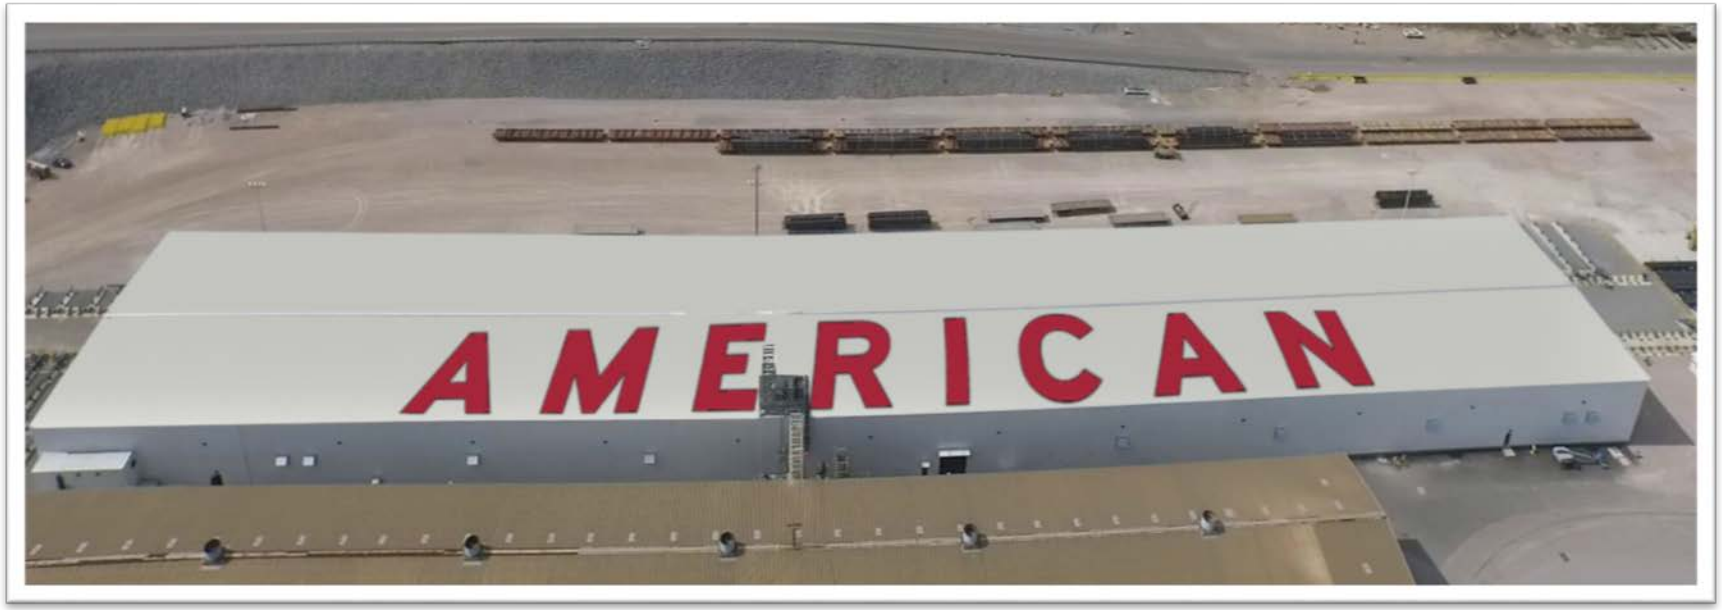
We are AMERICAN



AMERICAN

THE RIGHT WAY

CORPORATE MISSION STATEMENT

We at AMERICAN are committed to providing vital products to society. We believe in doing things the Right Way, treating our customers, our employees and our communities the way we want to be treated.

JOHN EAGAN - A LIVING LEGACY

- John Eagan was born April 22, 1870 in Griffin, Georgia
- Mr. Eagan was presented with an opportunity to invest in a venture that would provide clean drinking water to the world
- AMERICAN was chartered in 1905 and he was appointed President
- Mr. Eagan founded the company on the Golden Rule philosophy by promoting service to the buying public and employees

Divisions of American

- Ductile Iron Pipe Division
- SpiralWeld Pipe Division
- Flow Control Division
- Steel Pipe Division

AMERICAN Ductile Iron Pipe

- Ductile Iron Pipe and Fittings made in sizes 4.00”-64.00” in 20’ nominal lengths
- Water and wastewater transmission and distribution
- Internal coating on-site for sewage use
- AWWA C150 Standard, 60-42-10

Ductile Iron Pipe Distribution Centers

ACIPCO Owned Depots:

- Alto, MI
- Lakeville, MN
- Plant City, FL

Ductile Iron Pipe Distribution Centers cont'd…

ACIPCO 3rd Party Depots:

- Harrisonburg, VA
- Barre, MA
- Henderson, CO
- Kansas City, MO
- Glendale, AZ
- Portland, OR
- Stockton, CA

IMPLEMENTED 06/2019

AMERICAN SpiralWeld Pipe

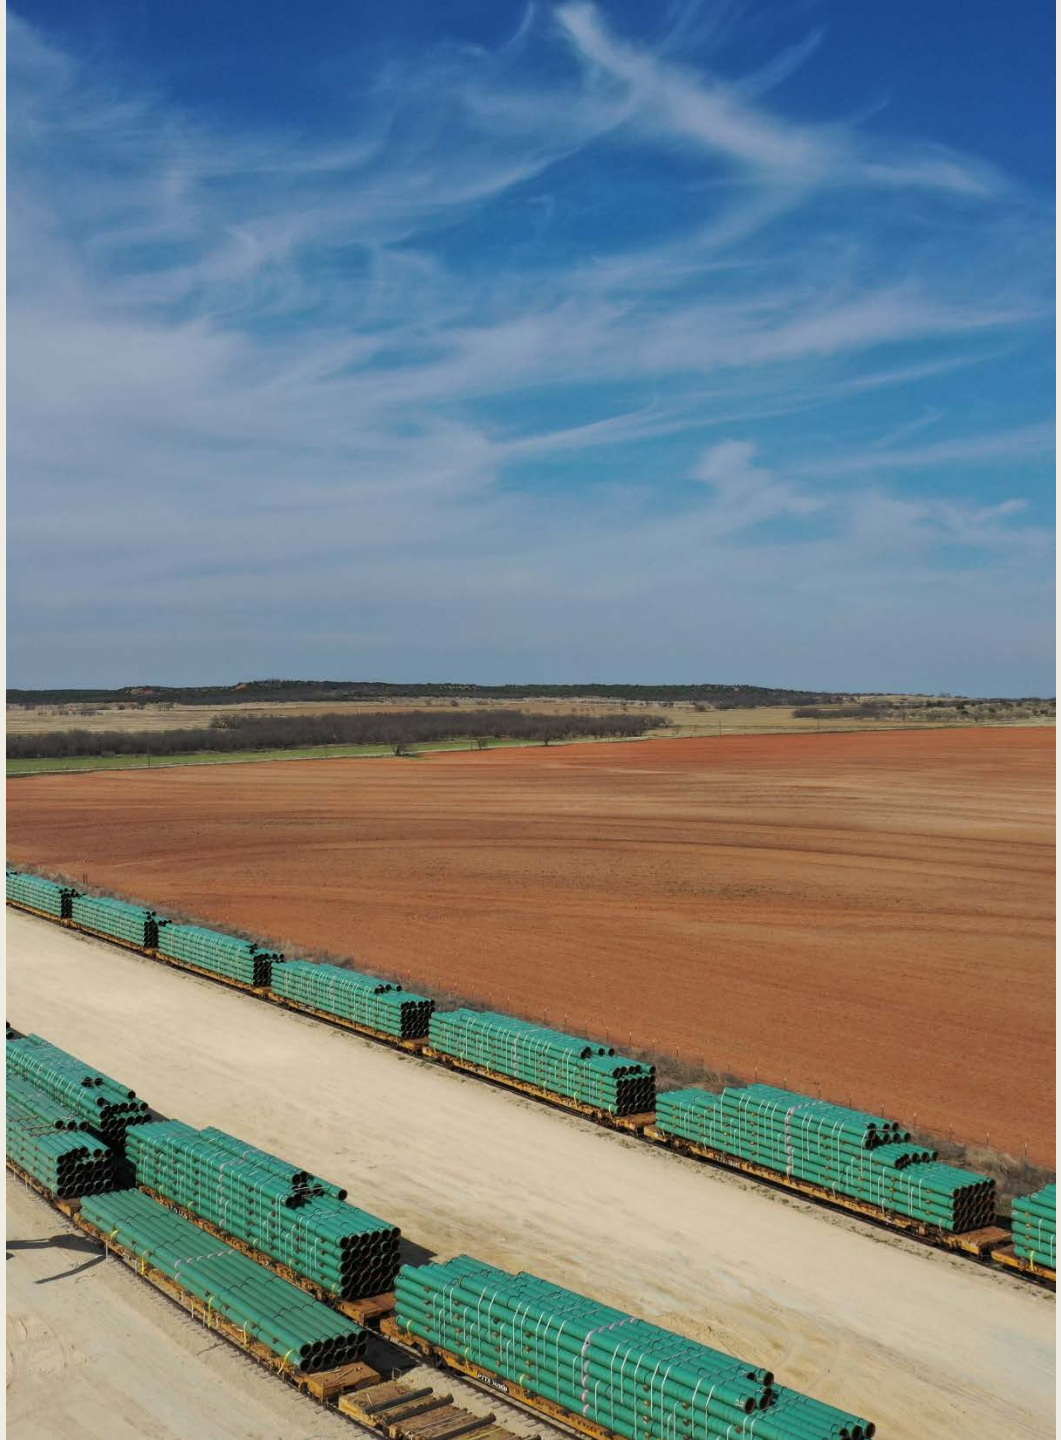
- Spiral-welded steel pipe made in sizes 24.00”-144.00”
- Used for large diameter transmission systems, and in the hydroelectric and power industries
- Plants located in South Carolina and Michigan
- Building a new production facility in Paris, Texas

AMERICAN Flow Control

- Valves, Fire Hydrants and Pumps
- 2 Hydrants:
  - *American-Darling (1969)*
  - *Waterous (1989)*
- Gate Valves up to 66.00”
- Plants in Beaumont, Texas and South St. Paul, Minnesota
- Building a new research facility in Crawfordsville, Indiana

AMERICAN Steel Pipe

- API grades for the oil and natural gas industries in API and CSA grades
- Piling and casing for structural, waterworks or abrasion-resistant applications
- Diameter sizes 12.75” - 24.00”
- Wall thickness up to .75" in most diameters
- API, ASTM and AWWA
- Lengths up to 100 feet
- Grade up to X80



On-Site Coating

Partnership with L.B. Foster since 1992.

L.B. Foster offers the following capabilities for 12.75” to 24.00” steel pipe in Birmingham, Alabama:

- Fusion-Bonded Epoxy Coating (FBE)
- Abrasion-Resistant Overcoating (ARO)
- Internal Lining

Loading at L.B. Foster

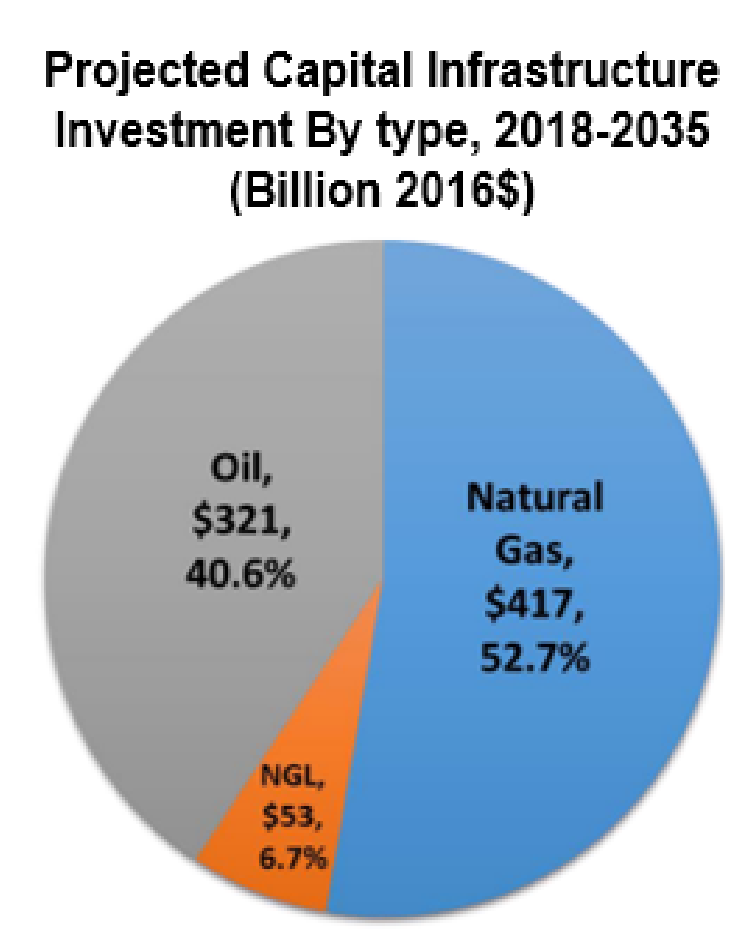
Steel Pipe Loading

Natural Gas and Safety

- North America has created the safest interstate natural gas pipeline system in the world
- Pipelines follow federal and state regulations and engineering standards
    - *They often exceed these standards*
- Pipelines monitored 24/7
- Regular inspections of pipelines are performed by “pipeline pigs” or inline inspection tools

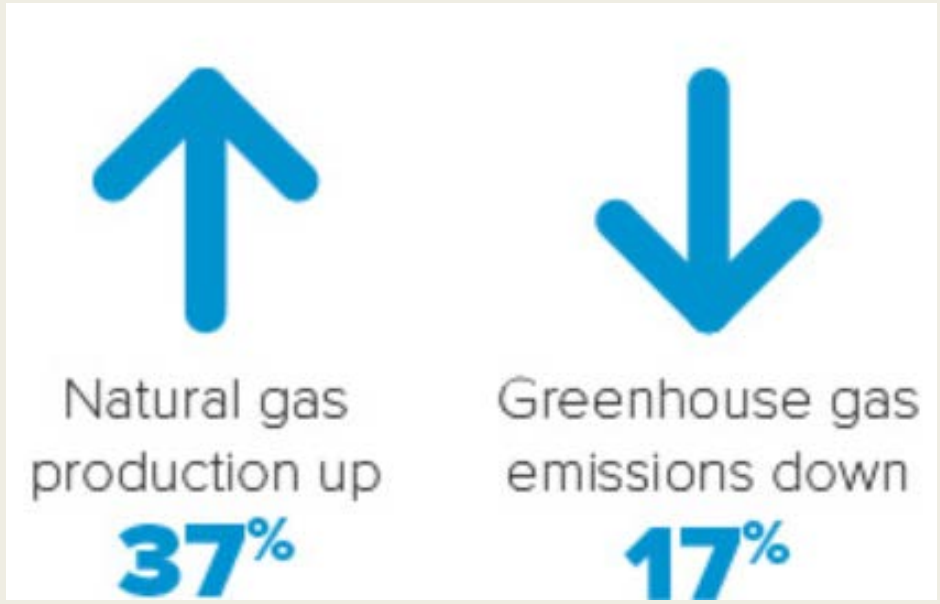
Natural Gas and the Economy

- Natural gas lines have created jobs, indirectly and directly
  - *4 million Americans have jobs due to the natural gas industry*
  - *By 2040, the natural gas industry is predicted to generate 5.2 million jobs*
- Natural gas provides fuel for domestic manufacturing, fertilizer and plastic production and electric power generation
- Abundant, reliable and affordable source of domestic natural gas provides consistent energy prices and cost savings
  - *American consumers save an average of $874 per year in home heating due to natural gas production*



Natural Gas and the Environment

- Natural Gas burns with fewer emissions, including greenhouse gas emissions, than all other fossil fuels
- It works hand in hand with renewables by providing a reliable source of energy when it is not sunny or wind is not blowing
- To build a pipeline:
  - *Pipeline companies propose a plan to federal regulators*
  - *Obtain legal access from landowners*
  - *After completion, the land is left in as good or better shape than when it was obtained*



Where does the API Line Pipe Go?
