SUBJECT: Quality Assurance Program Implementation,  
Group E-2

TO MEMBERS AND PRIVATE CAR OWNERS

QA-13-E-2  
(c-7505 )

Gentlemen:

The Mechanical Division of the Association of American Railroads herein provides additional details concerning the continuing implementation of the Quality Assurance Program. As you will recall, the implementation of the program was originally announced in circular letter c-7081 dated September 10, 1985 and further explained in circular letter c-7149 dated November 10, 1986.

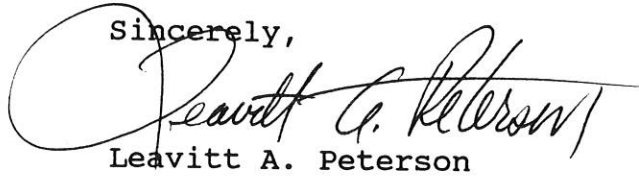

Contractors (as defined in M-1003) of components in Group E-2 are herein invited to advise the Director-Technical Committees-Quality and Components in writing of their intent to make application for Quality Assurance Certification under the provisions of Specification M-1003 by August 31, 1990. Group E-2 components include reconditioned brake beams and air brake repair shops.

Upon receipt of a letter of intent, an application form and additional information concerning the certification process will be provided to each potential applicant. Contractors filing formal applications accompanied by payment of the initial \$750.00 fee by September 28, 1990 and their Quality Assurance Manuals by November 30, 1990 will be assured common group status; that is certification will be awarded to qualifying contractors in that group simultaneously, provided all necessary information is furnished by the applicant in a timely fashion.

Any changes to the schedule for completion of certification requirements for Group E-2 will be given well in advance of established deadlines.

Your support and cooperation will be sincerely appreciated.

Sincerely,

A handwritten signature in cursive script, reading "Leavitt A. Peterson". The signature is written in black ink and is positioned above the printed name.

Leavitt A. Peterson
